Professional Summary

MSc Data Science and Analytics graduate (First Class Honours) with a strong analytical foundation and a meticulous approach to problem solving. Experienced in Python, SQL, and data validation, with practical exposure to hypothesis testing, root cause analysis, and full stack development. Comfortable working across data, software, and hardware systems, with hands on capstone experience building an embedded IoT solution. Brings a methodical, evidence-based mindset suited to technical, analytical, and engineering-focused roles. **Eligible to work full-time in Ireland (Stamp 1G).**

Key Skills

Programming and Databases: Python, JavaScript, R, SAS, C, SQL, PostgreSQL, MySQL, MongoDB.

Visualization and BI: Power BI (DAX), Tableau, Excel, Matplotlib, Seaborn, Plotly, ggplot2.

Techniques: EDA, ETL, Data Cleaning and Wrangling, Predictive Modeling, Statistical Analysis, Reporting Automation, KPI Reporting, Processes Mapping, Time Series, Clustering, Neural Networks, Regression.

Testing and Verification: Test Planning, A/B Testing, Hypothesis Testing, Data Validation, Root Cause Analysis, Defect Documentation, Software Development Lifecycle (SDLC).

Tools and Technologies: GitHub, GitLab CI, Jenkins, QGIS, RStudio, React.js, Node.js, REST APIs, AWS, Azure, Arduino, IoT Systems, Networking Fundamentals.

Professional Strengths: Strong Problem-Solving and Adaptability, Cross-Functional Teamwork and Collaboration, Effective Interpersonal Skills, Excellent Time Management and Emotional Intelligence.

Professional Experience

Data Quality Analyst — Excellence Technology

November 2022 – July 2024 | India

- Defined test criteria and validation rules to examine accuracy across 50K+ data records using Python and SQL, identifying and logging inconsistencies as defects for correction, which raised overall data accuracy by 80%.
- Built and maintained Python and SQL scripts to run repeatable validation checks on incoming data, catching errors before reporting and reducing manual rework by 45%.
- Applied a test-and-verify approach to evaluate ML models (regression/classification) against accuracy benchmarks, documenting model performance criteria and attaining 90%+ accuracy before deployment.

Business Analyst — Eminence Internet Technology

January 2022 – August 2022 | India

- Verified project and revenue data against source records using SQL-based checks, identifying discrepancies and improving reporting accuracy by 70%.
- Tracked project metrics against defined benchmarks, flagging deviations early and using findings to refine workflow efficiency by 80%.
- Managed 20+ concurrent freelance engagements end to end, securing a 40% conversion rate through clear stakeholder communication and prioritization.

Education

MSc Data Science and Analytics — Maynooth University, Ireland

September 2024 – July 2025 | First Class Honours (1.1)

- Capstone Project:** AI-Based Prostate Cancer Risk Prediction Model using Python and machine learning techniques: Built CNN-based deep learning model achieving 97% accuracy for risk classification.

Bachelor of Computer Applications (BCA) — Chitkara University, India

August 2019 – July 2022 | CGPA: 9.32

- Capstone Project:** Automatic Irrigation System using Arduino C and IoT principles.

Academic Projects

- Paris Olympics Data Analysis (R):** Analyzed Paris Olympics 2024 shooting events data using R and RStudio, evaluating participation trends, gender representation, and athlete performance metrics.
- Speed Dating Experiment (SAS):** Implemented statistical analysis and hypothesis testing on speed dating experiment data using SAS to identify factors influencing mutual romantic interest.
- Geospatial Database Project (PostgreSQL):** Engineered a geospatial database using PostgreSQL and QGIS to analyse the distribution of universities, restaurants, and pharmacies in Manchester, UK.
- SyncEdge Web Application (MERN Stack):** Co-ordinated to a full-stack collaborative platform built in a group project, with REST API integration and responsive frontend design. Executed manual testing across features to identify bugs and authenticate functionality before release.
